Intellectual property (IP) refers to creations of the mind, such as inventions; literary and artistic works; designs; and symbols, names and images used in commerce. IP is protected in law by, for example, patents, copyright and trademarks, which enable people to earn recognition or financial benefit from what they invent or create. By striking the right balance between the interests of innovators and the wider public interest, the IP system aims to foster an environment in which creativity ...

What is Intellectual Property?

Intellectual property is different from physical property. The “thing” that one has a right to is an idea rather than something physical like a car. A company might own the patent to a vehicle’s design without being able to claim a property right to each individual car of that type.
